

weber FP 200

Cement cleaner

■ Description

Cement cleaner with surface active substances.

■ Range of application

- Used for cleaning coatings contaminated with mortar, grout, cement based building debris.

■ Application substrates

- Ceramic, granite ceramic, natural stones.
- Please consult us for all other application substrates.

■ Conditions of application

- Ambient temperature is between +5 °C and +30 °C.
- Avoid application in very damp and/or hot weather.

■ Preparation of substrates

- The substrate should be sound.

■ Application

- **weber FP 200** should be diluted in ratio of 1/5 or 1/10 (**weber FP 200**/water) with water as per the condition of area to be cleaned.
- **weber FP 200** is applied on the area to be reached for one time via sponge or roller in manual application and applied to 3-4 m² area in machine application. Wait for 1-2 minutes and then clean.
- In very dirty areas, cleaning can be repeated by diluting less or without diluting. **weber FP 200** can be removed from the substrates if it is washed with plenty of water.

■ Attention points

- Wear gloves, avoid eye and skin contact during application of **weber FP 200**.

■ Limits of application

Not applicable on polished or finished substrates.

■ Consumption

50-70 ml/m².

■ Packaging

0,5 l plastic drum.

■ Color

Transparent.

■ Application tools

Sponge, roller, wiping machine.

■ Shelf life

1 year as of the production date in dry and moisture-free environment provided that packages will not be opened. Package should be kept tightly closed when not in use. Package should be protected against frost.

➤ The stated times apply for 20 °C substrate and ambient temperature and increase at lower temperatures and decrease at high temperatures.

➤ **Saint-Gobain Weber Yapı Kim. San. ve Tic. A.Ş.** is not responsible for the application errors arising from use of product beyond its intended purpose or failure to comply with the foregoing application conditions and advice on the product.
